

CEA Manager

Frequently Asked Questions:

..delivering more from your ERP Systems

| | |
|--|---|
| Do I need to be logged into BPCS/LX to see the CEA configuration options? | No - CEA Manager is a stand alone application on your PC |
| Can I edit any configurations via CM? | No - it is a read-only application but the help text guides the user on where/how to make updates in the CEA configuration |
| How often is the CM database updated? | CEA manager is stored on a local MS Access database and is only updated when you prompt from the application |
| Does it highlight any configuration errors or inconsistencies? | Yes - there is a full set of tests which you can run over your database with a single click to highlight potential errors such as missing Aliases etc.. |
| Does it recognise user-defined macros? | Yes - you can manually add user-definitions in CEA manager |
| Can it only be used for a single BPCS/LX environment? | No - you can set-up multiple environments, on different servers and refresh them on demand - it is very easy to switch between different databases and also to see the same database from different times to compare any changes |
| Can I see multiple elements within the CEA configuration at one time? | Yes - CEA Manager allows you to drill from Reason code through Event, Model, Alias/Macro /Segment values in multi-window display |

| Minimum Software | Recommended Software |
|---|------------------------------|
| Windows XP SP3 | Windows 7 (32-bit or 64-bit) |
| Application Database: SQL Server 2000 Service Pack 4 | SQL Server 2008 |
| Microsoft .Net Framework 4.0 | |
